Education

Washington University in St. Louis — St. Louis, MO
BS in Computer Science, Minor in Design – 3.56 GPA — *Graduated May 2025*

Experience

Instructor – AI Literacy and App Development — April 2026 – Present
POCO Foundation (non-profit organization) — *Los Angeles, CA*

- Designed and taught an AI literacy curriculum for 30 high school students with no prior coding experience, covering LLM fundamentals, prompt engineering, and no-code app development
- Led students through building and publishing functional mobile apps using Thunkable, including Android APK distribution
- Created instructional materials (slide decks, scripts, session plans) translating technical AI concepts (hallucinations, context windows, agents) into beginner-accessible lessons
- Ran live, interactive Zoom sessions using breakout rooms and team-based competitions to drive engagement

Disney College Cast Member — September 2025 – January 2026
Walt Disney World College Program — *Orlando, FL*

- Applied operational standards to ensure safe, high-quality environments for thousands of daily guests
- Coordinated with team members across shifts to maintain seamless park operations

Teacher's Assistant – Web Dev, Intro to Computer Engineering — August 2024 – May 2025
Washington University in St. Louis — *St. Louis, MO*

- Assist students with in-class studios, assignments, and coding concepts
- Hold office hours for additional support and clarification of course material
- Grade assignments using rubrics and provide feedback to improve student performance
- Support course organization and coordination with instructors

Marvis Technology - IT Intern — May 2023 – July 2023
Hybrid – Remote, In-person — *Los Angeles, CA*

- Managed client relations and projects for small businesses, improving IT infrastructure through targeted solutions
- Adapted to remote and on-site work, building strong relationships with colleagues and clients
- Provided technical support to users with a variety of questions related to computer systems, software and hardware
- Performed troubleshooting on various software applications and systems

Projects

SpikeReport – Valorant Content Hub | *Next.js, TypeScript, Tailwind CSS, Vercel* — 2025 – Present

- Built and deployed a personal Valorant publication site covering patch notes, pro scene roster moves
- Architected a **markdown-based content system** with frontmatter-driven metadata, enabling new articles to be published without any code changes
- Designed a **mobile-first** layout with a custom component library in **Tailwind CSS**, optimizing for readability and fast load times
- Integrated **Vercel Analytics** to track traffic and reader engagement across content categories

Plates – Fitness Social Media App | *Swift, SwiftUI, Firebase, Figma* — April 2023 – Present

- Built a fitness social app with **Swift** and **SwiftUI** for seamless iOS development
- Integrated **Firebase** for secure user authentication, real-time database synchronization, and scalable storage, enabling smooth content sharing and engagement
- Led **UI/UX design** in **Figma**, producing wireframes and prototypes for a consistent user flow
- Utilized **Git** for version control and collaborative development, maintaining a structured workflow for timely feature delivery

Technical Skills

Languages: Java, Python, C/C++, C sharp, SQL, JavaScript, HTML/CSS
Frameworks/Developer Tools: React, Node.js, Git, Google Cloud Platform, VS Code, Visual Studio, Eclipse
Libraries: pandas, NumPy, Matplotlib
Design/Media Tools: Figma, Adobe Photoshop, Illustrator, InDesign, Premiere Pro, After Effects, Lightroom, CapCut
